

27<sup>th</sup> January 1970

My dear Goenka,

We have been watching with close attention and great interest the progress of your work in India for the Buddha Sasana and we are extremely glad to hear of the continued success of all the courses of meditation conducted by you in India with our blessing ...

... In the same way as the Buddha had to fight his way through to gain supremacy over all the untoward forces so also you must fight your way through ...

... With loving kindness for all sentient beings and those taking the course in particular, you must proceed with your work fully confident of successful outcome. We are always with you in this endeavour and we hope, Brahmas and Devas permitting, to be able to come over to India for personally attending to this, the greatest work for mankind. With the changes taking place all over the world, there must be a day where men with parami will fall into the scope of the Dhamma Chakra...

... With kindest regards,  
Blessings always from me & sayama
